ABSTRACT

This 1984-85 statistical survey of libraries at four-year colleges and universities, two-year colleges, law libraries, and miscellaneous academic institutions in the Pacific Northwest provides relevant data for comparison and inventory purposes. A total of 98 institutions responded to the questionnaire, which was administered by the Pacific Northwest Library Association (PNLA). Although the current questionnaire follows past practice in order to provide comparable data, some changes have been implemented. Questions dealing with online interlibrary loan capability were omitted and several questions relating to usage were added; i.e., circulation figures, reference transactions, gate counts, bibliographic instruction statistics, database transactions, and hours of service. Divided by type of institution, data tables include but are not limited to the following topics: (1) rank by collection size; (2) volumes held as of June 1985; (3) volumes per full time student; (4) growth rate; (5) total microform units; (6) audiovisual units (broken into categories); (7) government documents; (8) number of items borrowed; (9) current serials; (10) total library operating expenses; (11) professional staff; (12) non-professional, non-student staff; (13) number of male/female professional staff; (14) number of hours in professional work week; (15) beginning professional salaries; and (16) director's salaries. The survey instrument, instructions for completing the questionnaire, and an index to respondents are included. (THC).

## INTRODUCTION

This compilation of academic library statistics for the Pacific Northwest is the result of the fourth biennial survey. First published in PNLA Quarterly in the summer of 1980 (with U.S. and B.C. university library statistics for 1978-79, and B.C. 2-year college library statistics for 1976-77), the statistics have since been published separately in April, 1982 and April, 1984. Serials librarians will appreciate that, while the editors have changed, the title has remained the same.

The PNLA Academic Division, reconstituted as the Academic Interest Group in the fall of 1985 (due to a change in PNLA's constitution), has been steadfastly working with other groups involved in collecting academic library statistics with a view to reducing the number of questionnaires which gather the same data in different formats. Most recent efforts have centered on developing an ACRL questionnaire which would meet the needs of academic libraries in the Pacific Northwest for timely data. Unfortunately, as of the summer of 1985, these efforts had not borne fruit, and the PNLA Academic Division members present at the annual business meeting agreed to continue the biennial survey.

The current questionnaire follows past practice in order to provide comparable data. However, some changes have been implemented, based on a draft ACRL survey. Omitted in this latest survey were questions dealing with online interlibrary loan capability. Several questions relating to usage were added:

circulation figures, reference transactions, gate counts, bibliographic instruction statistics, database transactions, and hours of service. Surprisingly, most libraries were able to provide figures for these new categories.

The return rate is down this year. While 126 returns were received for the 1978-79 survey, 141 for 1980-81, and 129 for 1982-83, only 98 returns were received for the current year. Of these, two were received too late for data entry, and one was a blank response from a library which had ceased operations in the summer of 1985.

Over the life of these surveys, institutions have come and gone. Some skip a year but resurface in a later survey, thus making direct comparisons from year to year problematical. This year's data show a number of new (to our publication) Oregon libraries, for example.

There are a number of caveats for the reader. Firstly, and this has been a problem since the survey's inception, some libraries report volume holdings, and others report titles. This means that some statistics are not directly comparable. It is, therefore, important to check the footnotes. Physical holdings (volumes) are given unless noted as bibliographic in the footnotes.

The Canadian dollar has been converted to U.S. dollars by our usual method, taking the average noon exchange rate each month, July, 1984 through June, 1985, as published in the Bank of Canada Review. This year the average was $1.3387583 U.S. per Canadian dollar, so the Canadian dollar was converted to U.S.

dollars at .7469608. Due to the devalued Canadian dollar, Canadian salaries and expenditures will appear lower than usual.

Many Canadian libraries use March 31, rather than June 30, as the end of the fiscal year. This is indicated in the footnotes where it appears on the questionnaires. Some libraries have changed other dates to match regular reporting dates.

A number of additional tables have been added this year. In checking the data, it was clear that certain figures, if left in the calculations, would skew the data in an unwarranted fashion. For example, several libraries reported professional work weeks in excess of 40 hours. It is likely that these figures were determined by multiplying the number of librarians by a 40-hour work week. Other libraries may have had an unusual year in a given category, and the resultant out-of-line figures would significantly alter otherwise normal patterns. Thus, it was decided to exclude certain figures from averages, and these are so indicated in footnotes to the tables.

## NOTES ON OTHER AVERAGES

1. Very few libraries reported the average student hourly wage. The average hourly wage for the 19 libraries reporting this category is $3.67.

2. The average number of hours in the professional work week is 37.73. Universities (38.62) and law/miscellaneous libraries (38.86) tend to average longer hours than two-year colleges (36.43). Canadian institutions in all categories have shorter work weeks than their U.S. counterparts (35.35 versus 38.59).

3. The average number of bibliographic instruction sessions conducted for 1984-85 was 130. The average number of students receiving instruction was 1,384. Two-year colleges (180 sessions average) are more heavily involved in BI than are universities (103 sessions average) or law school and miscellaneous libraries (55 sessions average).

4. The percentage of male and female directors is virtually the same as four years ago at 65% and 35%, respectively, and there has been little change in the overall sexual composition of the professional positions:

| | 1980-81 | 1984-85 |
|---|---|---|
| Male | 43.6% | 42.8% |
| Female | 56.4% | 57.2% |

5. Table 8 gives the average percentage of catalog records in machine-readable form for those libraries reporting a percentage higher than zero. An additional 14 libraries reported 0%, and if figured into the average, would bring the percentage down from 66% to 56%.

## PNLA ACADEMIC LIBRARY SURVEY 1984-85

### INSTRUCTIONS FOR COMPLETION OF THE QUESTIONNAIRE

**GENERAL**

1. Definitions of the Statistical categories used in this questionnaire can be found in Library Statistics: A Handbook of Concepts, Definitions and Terminology (Chicago: American Library Association, 1977).

2. Round figures to the dollar.

3. In a university which includes both main and branch campuses, an effort should be made to report figures for the main campus only. (The National Center for Education Statistics in its Higher Education General Information Survey describes a branch campus as one "located in a community different from that in which its parent institution is located...beyond a reasonable commuting distance from the main campus...") If figures for libraries located on branch campuses are reported, please provide an explanatory footnote.

**COLLECTIONS**

Questions 1-5. Use the ALA definition for "Volume" as noted in instruction 1 above. Include duplicates and bound volumes of periodicals. Exclude microforms, nonprint materials, uncataloged items, and government documents unless cataloged. (Government document volumes classed separately may be included if cataloged.)

Question 6. Include duplicate subscriptions and government document serials if they are checked in as a separate item. Because of the number of questions raised regarding the counting of serials, we call to your attention the definition to be used for this survey.

> Publications constituting one issue in a continuous series under the same title published at regular or irregular intervals, over an indefinite period, individual issues in the series being numbered consecutively or each issue being dated. Newspapers as well as publications appearing annually or less frequently are included in the definition.

Question 7. Audiovisual units - a bibliographical unit, whether issued in one or several reels, discs, slides, or parts. A unit that is (or would be) catalogued separately.

> Cartographic material - sheet maps, aerial photographs, models globes

Graphic materials - art originals, prints & reproductions, photographs, posters, slides & slide/tapes, transparencies and filmstrips.

Audio materials - audio cassettes, cartridges, discs, reels, talking books, and other sound recordings

Film -film cartridges, cassettes, and loops; 8 mm, super 8 mm, 16 mm, and other film reels

Video - video cartridges, cassettes, discs (non-digital), reels and other video

Multimedia kit - a collection of resources including more than one type of medium intended for use as a unit and in which no medium is clearly dominant

Three dimensional materials - dioramas, games and simulations, models and mock-ups, puzzles, sculpture, realia, except globes and other cartographic models

PERSONNEL

Questions 11-19. Report the number of staff in filled positions, or positions which are only temporarily vacant. Include staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. It is preferred that the number of FTE staff be determined on the basis of the length of the work week in the reporting library.

Each library should report those staff members it considers professional, including when appropriate, staff who are not librarians.

EXPENDITURES

Questions 22-24. Report all expenditures, regardless of whether the funds come from the regular library budget or from special funds, such as research grants. when special project or grant funds are included, please provide a footnote indicating the amount of such funds. Include federal funds for work study students.

For serials subscription costs (#22) include all monies spent on items included in question 6.

USE

Questions 25-31.

Charged circulations. The loan or renewal of an item from the library's collection for use generally (although not always) outside the library.

Reference transaction. an information contact that requires knowledge, use recommendations, interpretation, or instruction in the use of one or more information sources. Exclude directional transactions.

Gate count. The number of persons who enter/exit the library building.

Bibliographic instruction. An information service which is designed to teach library users how to locate information efficiently. Total students: count individuals in group and individual instruction sessions.

Database reference transaction. A reference transaction that results in a search of one or more machine-readable databases. Do not include internal library use or convenience, such as ILL verification, ready reference use, cataloging.

Hours. Number of hours per typical week the library is open for service. Exclude hours the library, or a portion of the library, is open merely for "after hours" study with no services or collection access. Report hours of central library in case of library with branches.

ENROLLMENT

Question 32. Please use figures reported to the U.S. Department of Education on the form entitled "Higher Education General Information Survey, Fall Enrollment in Institutions of Higher Education", or other official indicator.
